MELLIN'S FOOD

In every step in the manufacture of Mellin's Food there is constantly in view the ultimate object of making a product of definite composition

to Accomplish a Definite Purpose.

This purpose is to furnish certain food elements which, when added to cow's milk, make it a suitable food for an infant. The food elements in Mellin's Food —carbohydrates (maltose and dextrins), proteins and salts—when dissolved in water and added to cow's milk so change the balance of nutrition in cow's milk that the resulting modification presents fat, proteins, carbohydrates and salts in the proportion needed

for the Development of Infantile Life.

The success of Mellin's Food, therefore, depends not upon any one of the food elements of which it is made up, but upon the definite composition of "Mellin's Food as a whole" as a means to enable the physician to modify cow's milk to meet the requirements of infant feeding

in a Scientific, Rational and Efficient Manner.

MELLIN'S FOOD COMPANY, BOSTON, MASS.

Cameron's Electro-Diagnostoset

FOR

Accurate Diagnosis **Direct Illumination**

Improved Instrumentation

Gives a lifetime of service!

1. The Electro-Tonsilassistant. An instrument that will never slip and is easily adjusted. Illuminated with lamp carrier in the palatal arch out of the field of operation. Cannot burn or shock the patient. Perfectly insulated and not affected by blood or mucous. Rapidly superseding the head lamp and head mirror in tonsillectomy, adenectomy and all oral surgical operations. Abundant light and plenty of room, with both hands free.

2. The Diagnostolite. A small, cool, white, sanitary Opalite electric lamp—the surgical searchlight. With the detachable laryngoscopic mirror it is excellently adapted for examination of the post-nasal region, vocal cords, tonsils, etc. Also specially adapted for transillumination of the cornea, the nares and the frontal and maxillary sinuses; and for probing deep abdominal wounds and for the location of veins for intravenous injections.

3. The Right-Angle Dentalamp. Has the proper curvature for transillumination and examination of the dental process. Because of the searchlight principle, it furnishes seven hundred per cent. more illumination than ordinary lamps of similar voltage, making it possible to transilluminate and locate foci of infection by shadows throughout the alveolar process.

4. The Antralamp. Designed for all delicate surgery, being but 5 mms. in diameter. Because of its coolness may be safely used in the ear for transillumination of the mastoid process, in the nares, in surgical excisions and all cavity examinations; for brain surgery, probing of bullet wounds, etc. Particularly helpful where a very small lamp is needed for examining children.

5. The Nasal Speculum. Furnished with the Diagnostoscope. Has an opening of 8x10 mms. and provides the most practical method of illuminating the nares for examination and operation. Invaluable in examinations of perforated or deflected septum, enlarged turbinates and polypi; and for locating foreign bodies in the post-nasal region.

6. The Diagnostolite. For transilluminating the frontal sinuses through the supra-orbital ridge and the maxillary sinuses through the infra-orbital ridge. With this method of diagnosis an infected antrum will not show transparency in the palatal arch on the infected side.

7. The Vaginalite. A self-retaining, electrically lighted vaginal speculum without springs or set screws, furnishing abundant and evenly diffused light throughout the vagina. The light can be attached or detached at will, so it is never in the way of the operator. The lamp carrier as well as the lamp may be sterilized by boiling. May be modified for use as a Sims Speculum. Is a positive aid in checking uterine hemorrhage, for vaginal treatments and applications, and for tamponage and curettage.

8. The Diagnostoscope. With aural speculum. For all aural examinations and operations. Gives a clear, magnified view of the tympanum without shadows or reflections. A wonderful aid in paracentesis, in removing foreign bodies and in treating lesions and inner ear infections. Includes both operating half lens and diagnostic lens, one each 3, 4 and 5 mms. ear specula, and pneumatic bulb for ear massage and aspiration.

9. The Mastoidlite. For transillumination of the mastoid process. Diagnosis is readily obtained by moving the Mastoidlite over the mastoid region, then observing transillumination through the lens of the Diagnostoscope, inserted into the ear canal. When infection is present, no transparency will be apparent in the inner ear, as compared to the pink transparency obtainable in the normal process.

10. The Spudlite. Most complete and most practical instrument for locating and removing all foreign bodies from the eye. Also used for removing splinters and imbedded objects from the skin, and for examinations of skin infections. The hinged magnifying lens is automatically in focus when raised, giving a magnification of five diameters. Complete with two eye spuds, one spear- and one chisel-shaped. Illumination, magnification and instrumentation under control of one hand!

An authoritative illustrated Treatise on "Diagnosis by Transillumination" (selling price $1.00), and a copy of our illustrated catalogue, will be sent you free on request.

Write for these today!

Calco

Cinchophen Calco
Tolysin

Accepted by the Council on Pharmacy and Chemistry ot the American Medical Association.

Two standard remedies in the treatment of Gout, Rheumatism, Arthritis, Neuritis, Neuralgia, Sciatica, painful joint and muscle conditions.

Acetannin Calco A. M. A.

Employed in the treatment of intestinal catarrhs, cholera morbus, cholera infantum and dysentery.

Salicaine A. M. A.

Reported to be much less toxic than Procaine (Novocain); a local anaesthetic.

Beta Naphthol Calco U. S. P.
Amidopyrine
(Dimethylaminoantipyrine)
Antipyrine Calco U. S. P.
Beta Naphthyl Salicylate Calco A. M. A.
Methylene Blue Calco, Medicinal U. S. P.
Beta Naphthyl Benzoate Calco (Benzo Napthtol Calco A. M. A.)

All Calco products are of uniformly highest quality
To obtain the desired Therapeutic effect specify "Calco"

American Laboratories

CLINICAL AND X-RAY

Formerly LABORATORY OF PATHOLOGY AND BACTERIOLOGY

Complete Equipment

No expense nor trouble is spared to procure the best apparatus, materials and instruments for our laboratory work. Spacious rooms for chemistry, bacteriology, pathology and serology, enable us to carry out the work in a prompt and efficient manner.

Complete Service

We are prepared to give physicians that all-round laboratory service required by modern methods of practice. This includes chemical tests, serological, pathological and bacteriological examinations, auto bacterins, and all the various analyses of milk, food, water, etc.

Modern X-Ray Facilities

Our equipment is complete and up to the minute. Consideration has been given to every device and accessory of value for making accurate X-Ray studies. An entire suite of rooms is available for preparation of patients; for display; consultation; study; X-Ray therapy; electrotherapy; radiographic, fluoroscopic and finishing work.

Physicians are cordially invited to send for our complete list of tests and examinations. As a reference and guide to the aid which the Laboratory can give to the practitioner, this list has a real, intrinsic value.

Mailing Containers on Request **Reports by Wire or Mail**

C. M. SORENSEN CO., Inc. **177 E. 87th St., NEW YORK**

Medical Research Laboratories

B. GRUSKIN, M. D., Director

800-842 Marshall Field Annex Bldg. Tel. Randolph 3848-49 25 E. Washington St., Chicago

Our Work

We do diagnostic analyses, and also cater to special problems and research

Our Staff

Consists of scientifically trained
BIO-CHEMISTS
SEROLOGISTS
BACTERIOLOGISTS
PATHOLOGISTS

Our Service

We aim to serve physicians by concentrating all our efforts to do accurate work and make prompt report of results

Serological Tests

WASSERMANN
ABDERHALDEN
TUBERCULAR FIXATION
GONORRHEAL FIXATION

Bacteriological Tests

SMEARS
CULTURES
VACCINES
ANIMAL INOCULATIONS

Bio-Chemical Examinations

Urine
Feces
Gastric Contents
Milk
Toxico-logical
Sanitary Investigations
Water
Air
FUNCTIONAL BLOOD:
Lipoids
Cholesterol
Urea
Uric Acid
Creatinin
Sugar
Carbon Dioxid Tension. **Basal Metabolism.**

Special attention to Serological Work. Also Food, Water Analysis. Containers and fee list mailed on request

CONTINUED ON PAGE 2374

THIS gentleman is wearing two Carnes Arms—one for amputation above elbow, and one for amputation below elbow. Can you guess which is which?

Thousands of men and women are using the Carnes Arm successfully in various occupations, in fact, practically all lines of work are represented by wearers of our arms. This unsolicited letter is one of many showing conclusively the value of the *Carnes Arm*.

"THE REMINGTON OIL ENGINE COMPANY
Stamford, Conn.

May 18, 1918.

To whom it may concern:

Mr. Everett Waterbury has been in the employ of the Remington Oil Engine Company for the past ten years in charge of the Assembling and Testing Departments.

A few years ago he had an accident while testing one of our engines. The accident necessitated the amputation of his left arm. Upon his return from the hospital, Mr. Waterbury purchased a Carnes Artificial Arm. In the course of a very short time he became so efficient in the use of said arm that today he does the same work with the apparent same ease as he did before the accident, with his two arms.

Yours very truly,

THE REMINGTON ENGINE COMPANY,
A. R. Hart, Secretary."

Physicians can safely and confidently recommend it to their patients needing a useful artificial arm. It is neat, durable and comfortable, after one becomes accustomed to wearing it.

Catalogue sent on request.

We manufacture arms and hands only

Guinea Pigs

For

Experimental Purposes

When you want them—as many as you want—any size. That is what our service means. We are the largest breeders and distributors of guinea pigs in America—with always a large supply on hand, and areable to fill any size order promptly.

Why depend on uncertain sources when you can be guaranteed an adequate supply by a large, well-rated, established commercial institution with years of successful operation behind it? Every guinea pig we send you is guaranteed to be in normal, healthy condition, to reach you in good order, and to be satisfactory in every way.

We also are able to supply rabbits, white mice and rats, etc.

Write us your wants—we will gladly quote you prices.

Castle-Rochester Electric Sterilizer

IMPROVED PATTERN

With entire bottom cast in one piece and with new lift that supports the instrument tray from below

No. 410—10½x5x3
No. 413—13x5x3¼
No. 416—16x6x3½

Push down on a cool lever—this opens the cover and lifts the instrument tray out of the boiling water. With the improved lift the tray always stays in the level position and further it is easy to remove the tray from the sterilizer. There are no more finger burns from steam and hot water.

Cost of operation is reduced to a minimum by a three heat control. The switch that controls the heat is right on the end of the sterilizer and has a dial that indicates which heat is turned on.

Faucet is provided to draw off the water and make it unnecessary to disconnect the sterilizer every time it is emptied.

Most important of all is the Castle automatic switch attached to the heater. This shuts off the current just before all the water has evaporated. The sterilizer will not burn out.

Castle-Rochester Sterilizers are sold by the leading Surgical Instrument dealers. Information can be secured from your dealer or direct from us.

JOHN'S VACATION — For boys from 10 to 15; 48 pages.

CHUMS—For boys from 16 to 18; 48 pages.

MARGARET, THE DOCTOR'S DAUGHTER—For girls from 12 to 14; 48 pages.

LIFE'S PROBLEMS — For girls from 15 to 18; 56 pages.

THE BOYS' VENEREAL PERIL

Carefully written, plain-speaking, uplifting. Gives instruction on sexual matters and how to guard against bad habits and disease. Should be placed in the hands of every boy.

THE SEX EDUCATION PAMPHLETS

should be kept constantly on the desk of every physician for distribution to parents and young persons.

Prices on request.

The New METABOLIMETER

Designed for bedside studies in

(Pronounced "ME-TAB"O-LIM'E-TER")

BASAL METABOLISM

Easily portable—wt. 14 lbs.

A duplicate of the model devised in the Department of Pathology, University of Illinois College of Medicine, Chicago, by Horry M. Jones, Ph.D., and reported in the Archives Int. Med., Jan. 1921.

TESTING ITS ACCURACY

The following tests of accuracy require no special instruments of calibration, or apparatus for standard of comparison. They may be performed with the apparatus, itself, by one familiar with its operation.

1. **Make a series of readings on several persons** in normal health. These readings will be found to correspond accurately with those metabolic rates known to be correct for persons in health.

2. **Select and test known pathological cases.** The plus and minus readings on these cases will correspond to your clinical findings.

3. **Take a reading on a given subject. After a** few moments repeat the test on the same subject. The readings will "check" within an average of 2%.

These tests are logical, and their evidence is clearly convincing.

MECHANICAL PRINCIPLE OF THE APPARATUS

1. The flexible breathing bag is distended slightly with a small amount of oxygen.
2. The respiratory system of the patient is then connected up with the apparatus in such a way as to form with it a continuous air-tight breathing circuit.
3. With each successive expiration the size of the distended bag (sensitive to 3 c.c. change in volume) decreases and at a certain point in this gradual diminution of its size (called the beginning point) the stop watch is started.
4. Now one liter of gas is injected into this air-tight breathing circuit from the measuring cylinder below. (This measuring cylinder is guaranted to duplicate its measurement of this gas volume within 0.2% regardless of barometric pressure, aqueous tension and room temperature. That you do not comprehend the scientific basis of this feature does not invalidate our guarantee. This is an exclusive feature of the Metabolimeter.) The bag is seen to be distended again with this added quantity, but with each inspiration decreases in size as before.
5. When so diminished in size as to equal its volume seen at the beginning point (now called the end point) the watch is stopped. The time on the stop watch represents the time required by the patient to consume the liter of gas, and from this the patient's rate of metabolism is made known immediately and without calculation from a chart, which accompanies the apparatus.

MANY PERSONS HAVE ENTIRELY MISUNDERSTOOD THE PURPOSE AND METHOD OF USING THE RUBBER BAG ATTACHED TO THE APPARATUS

Some imagine that it should be attached in some definite, fixed relation to the side of the alkali tower, that its texture would have to remain the same year in and year out, that its capacity must be known, that it must hang in an exactly horizontal position, and that all sorts of rigid conditions must be imposed upon it before one could get an accurate beginning- and end-point from such an indefinitely attached appliance.

Let us imagine the bag partially distended with some oxygen, say about 600 to 900 c.c. Now imagine the patient connected with the apparatus in such a way as to breathe this gas, gradually absorbing it, and therefore gradually reducing the size of the bag. Imagine this process (of gradually reducing the size of the bag) continuing until the contact button on the bag just fails to touch the alkali tower, at the end of normal expiration, i. e., with the bag in normal distension.

Is there anything about any of this procedure thus far which would be prevented by the position, or texture, or capacity of the bag? Now having accomplished this situation, suppose we discharge a measured litter of gas into the bag, which of course would distend again to accommodate this added volume. The patient by continuous rebreathing of this gas, will absorb the oxygen and thus again reduce the size of the bag until finally the contact button on the bag just fails to touch the alkali tower as before.

In other words, regardless of the position, or texture, or capacity of the bag, you establish a new position or beginning-point each time the test is performed. Then you make an addition of one liter of gas, and the patient makes a subtraction of an equivalent volume of oxygen, the bag remaining fixed in this newly established beginning-point position, until the end-point, which it resembles in all particulars.

Since the bag in this beginning-point position is sensitive to 3 c.c. reduction in the volume contents, and since a 15 to 20 c.c. reduction occurs with each successive respiration, it is evident how decisive the beginning- and end-points must be with normal respiratory rhythm.

Write for a list of leading institutions and internists who depend absolutely on its accuracy in the diagnosis of their borderline cases

CRAGMOR SANATORIUM

At Colorado Springs, Colorado

CLIMATE

THE climate at Colorado Springs is one of almost constant sunshine—averaging 310 clear days a year. The relative humidity is only about 50 per cent. The altitude is moderate, the mountain air bracing, and weather conditions such that patients may be comfortable out of doors the year round.

LOCATION OF CRAGMOR

Cragmor Sanatorium is located just outside the city limits of Colorado Springs—away from the distractions and temptations of city life. It is sheltered in the foot hills, with ample private grounds for recreation and exercise, and affords a wonderful view of the Rockies and rolling plains.

THE BUILDINGS

The buildings are designed especially for the comfort, convenience, proper care and treatment of patients. Every apartment has a commodious room, heated from the central plant, and a private sleeping porch open on two sides. Private baths may be had where desired.

MEDICAL SUPERVISION

The staff is especially trained in sanatorium work and is sufficiently large to insure individual care and attention to patients.

All form of tuberculosis are received, and Cragmor is equipped to give particular attention to laryngeal tuberculosis and cases requiring helio-therapy.

The aim of the management is to add every possible advantage of sanatorium regime and scientific care to the ideal climatic conditions.

Physicians are urged to feel free to write for any information. Address the Physician-in-Chief

SIGNS FOR PHYSICIANS,

SURGEONS, HOSPITALS AND SANATORIA

We are prepared to furnish bronze, brass, glass or wood signs of any type desired by the physician or institution. Our signs are noted for being substantial, dignified and effective in conveying their messages. The following are typical Kreiss designs. Most of them may be had in plain or bevelled edge, with any number of lines of lettering, and in appropriate sizes.

BRONZE

Cast in one piece; letters raised one-eighth of an inch from background. Letters and bevel polished, background statuary bronze finish. Lasts a lifetime.

BRASS

Hand engraved, not acid cut. Deep routed and filled flush with best patent self-drying enamel. Mounted on wood base with brass screws ready to put up.

WOOD

Made of first-grade pine well seasoned; 1⅛ inches thick; genuine gold-leaf letters and bevel black sand background. A durable sign, giving long service at low cost.

GLASS

Made of polished plate glass; gold-leaf background; black letters (or gold-leaf letters with black ground) Furnished with water-tight, weather-proof brass frame. No ugly screw holes in face of sign. This is the most practical physician's sign.

LAWN SIGNS

Double-faced board sign with letters and stripe genuine gold-leaf, background black sand. Standard is made of 1¾ pipe and stands 7 feet from ground to top of sign.

WINDOW SIGNS

Made of either polished plate glass with bevelled edge or of double thick window glass. Fitted with two holes and brass chain. Gold-leaf letters with black outline or shading.

OFFICE HOUR SIGNS

These we furnish in a wide variety of styles and sizes—ground glass suspended on brass chain; polished brass plate, fastened with screws; sheet steel japanned black with gold-leaf letters; window glass, double thick with gold-leaf letters and suspended by brass chain; plate glass; bevelledge, gold-leaf letters and brass chain for suspension. Also white opalite glass with black letters.

All signs are especially designed and executed to your order or individual requirements. Sketches free of charge for anything not covered in our catalogue or for odd sizes. Write us, indicating type of sign you desire and we will be glad to quote prices. Catalogue on request.

A NEW

PROMETHEUS

STERILIZER

What if it boils dry?

When someone forgets to switch off the current the Sterilizer boils dry.

Without protection, the Heating Element then would burn out. But not so in the Prometheus. Before the danger-point is reached, the current switches off automatically.

And that isn't all. To reset it you needn't turn the sterilizer upside-down, nor need you use any tools but your hands, nor even disturb or move the Sterilizer. Simply reset it and it is again ready for service.

This is only one of the many good points of the Sterilizer that always was best, and is now better than ever.

Ask your dealer or write to

STANFORD UNIVERSITY

MEDICAL SCHOOL

The Medical School of Leland Stanford University is an integral part of the University, and its Faculty controls the Lane and the Stanford University Hospitals which, together with the Lane Medical Library, are administered by the Trustees of the University.

ADMISSION— Three years of University instruction, including English and Physics, Chemistry, and Biology with laboratory work in each, also a satisfactory reading knowledge of French or German, are required for admission to candidacy for the degree of Doctor of Medicine. For these special requirements see the Medical School Announcement which may be obtained on application to the Dean of the Medical School.

INSTRUCTION— The work in Medicine begins the first of October each year and closes about the middle of June. The first five quarters of the four years Medical instruction are given in the laboratories of the University at Palo Alto, California, the last seven quarters and the required interne year, in the buildings of the Medical School in San Francisco. The degree of A.B. is granted upon completion of the first three quarters of the Medical curriculum; the degree of M.D. upon completion of the interne year.

TUITION— The tuition fee is $60 per quarter for twelve quarters, payable at the beginning of each quarter.

For information address

THE DEAN of the Stanford University Medical School
2398 Sacramento St., San Francisco, California

UNIVERSITY OF PENNSYLVANIA

1920—THE GRADUATE SCHOOL OF MEDICINE—1921

Opportunities for graduate study in special branches of medical and surgical practice and research are furnished to limited groups of suitably qualified physicians as follows:

COURSES:

Internal Medicine (a) (h)
Pediatrics (b) (h)
Neurology (a) (h)
Dermatology-Syphilology (a) (h)
Roentgenology (c)
Surgery (d) (i)
Gynecology-Obstetrics (d) (i)
Orthopedics (a)
Urology (d) (i)
Proctology (e)
Ophthalmology (f) (i)
Otolaryngology (d) (i)
Medical Sciences (e) (g)

KEY

(a) Two four months' courses, the second being substantially a repetition of the first; Oct. 4 to Feb. 2, and Feb. 3 to May 28.
(b) Same as (a) except that dates are Sept. 1 to Dec. 23, and March 1 to June 24.
(c) One twelve months' course, beginning Oct. 4. One twelve months' course, beginning Feb. 7. One twelve months' course, beginning June 6.
(d) One eight months' course, Oct. 4 to May 28.
(e) Special schedules. Other special schedules may also be arranged.
(f) One ten months' course, Oct. 4 to July 23.
(g) Research scholarships—one or more years—may be sole study in the school; or may succeed (h) or (i).
(h) Continuation courses beyond the initial registration periods—usually of four months' duration.
(i) Same as (h) except that duration is usually ten months.

Each definite course as above is distinct from the others; and each of such courses occupies the whole reasonable working time and attention of the student—in general, two courses cannot be taken concurrently. Special schedules (e) form an exception.

Attendance and examinations obligatory. Successful students in (a) (b) (d) (f) receive suitable certificates, which are precise, official statements of the actual facts in each case. Successful candidates in (c) (g) (h) (i) receive diplomas. Initial registrations are solely in (a) (b) (c) (d) (e) (f) (g). The supplementary registrations (h) (i) are at faculty option. Degrees conferred are Master of Medical Science (with a notation of nature of course) for proficiency in special practice; and Doctor of Medical Science (with notation of nature of research) for productive medical research.

Fees: Four months' courses, $200; eight months' courses, $400; ten months' course (Ophthalmology), $450; twelve months' course (Roentgenology), $600; special schedules (few only), special fees.

Prospective students should not come to Philadelphia before correspondence with the Dean has resulted in definite registration conditioned upon available places in limited classes, upon the approval of professional and ethical credentials, etc.

A central organization within the University has graduate medical education as its sole business and domain. With this central organization cooperate the general University facilities and a large group of clinicians, medical educators, clinics and laboratories in Philadelphia.

FACULTY:

The Faculty totals about two hundred and thirty teachers, comprising about seventy professors with their associates and assistants, and providing a group of experts in each of the various clinical and laboratory specialties.

ADDRESS: Dr. George H. Meeker, Dean, Graduate School of Medicine, University of Pennsylvania, Philadelphia

Northwestern University
Medical School

Situated in Chicago in close proximity to important Hospitals with an abundance of clinical material.

Admission Requirements—Two years of College credit including a satisfactory course in Physics, Chemistry, Biology or Zoology, and French or German.

Course of Study—leading to the degree of Doctor of Medicine—Four years in the Medical School and a fifth year either as Intern in an approved hospital or devoted to research in some branch of Medical Science.

Graduate Instruction—in courses leading to the degree of Master of Arts or Doctor of Philosophy.

Research Foundation—The James A. Patten Endowment for Research affords unusual opportunities for advanced students of Medical Science to pursue special investigations.

Research Fellowships—Four fellowships of the value of $500 each are awarded annually to promote scholarship research.

Fees—Including laboratory and hospital charges do not exceed $220 a year.

For information address, The Dean,

Northwestern University Medical School
2421 South Dearborn Street Chicago, Illinois

RUSH MEDICAL COLLEGE

In Affiliation With

The University of Chicago

For Particulars, Address

RUSH MEDICAL COLLEGE Chicago, Ill.

THE UNIVERSITY OF ILLINOIS
COLLEGE OF MEDICINE

MINIMUM ENTRANCE REQUIREMENTS—Minimum requirements, two years in a recognized University or College of Liberal Arts and Sciences, in addition to fifteen units of work from an accredited high school.
Persons matriculating as first year medical students for the year beginning October 1, 1917, or thereafter, after finishing the four-year curriculum, must complete satisfactorily a hospital course of not less than twelve months' duration in an approved hospital before receiving the diploma of Doctor of Medicine.

CLINICAL FACILITIES—Close affiliation is enjoyed with the following hospitals: Cook County Hospital, County Morgue, University Hospital, Augustana Hospital, Michael Reese Hospital, St. Mary's Hospital, St. Luke's Hospital, Illinois Charitable Eye and Ear Infirmary, and Home for Destitute Crippled Children.
New Clinical Buildings will provide the University with a teaching hospital of 300 beds.

Collegiate year begins September 26, 1921. For full information, address Secretary, College of Medicine, University of Illinois, Congress and Honore Streets, Chicago, Illinois.

INDIANA UNIVERSITY
SCHOOL of MEDICINE

BLOOMINGTON and INDIANAPOLIS
CHARLES P. EMERSON, *Dean*

B. D. MYERS, *Assistant Dean*
Bloomington, Ind.

E. D. CLARKE, *Secretary*
Indianapolis, Ind.

Term opens about September 15th of each year. Clinical Facilities: Five hospitals, one of which is owned by the University. The obstetric service is ten times larger than required by State Boards. Forty-two internships are open to graduates.

UNIVERSITY of LOUISVILLE
MEDICAL DEPARTMENT

Founded in 1837 **LOUISVILLE, KY.**

Minimum Entrance Requirements—15 units High School; two years Pre-Medical College Credits; Combined S.B.-M.D. degrees through Courses in College of Arts and Sciences and Medical Department.

Clinical teaching in million dollar Municipal Hospital.

All-time Clinical teachers Medicine and Surgery.

Classes limited in number.

HENRY E. TULEY, M.D., Dean, 101 W. Chestnut St., Louisville, Ky.

UNIVERSITY of MICHIGAN
MEDICAL SCHOOL

The University of Michigan Medical School requires a minimum of two years of college work for admission, the same to include English, chemistry (general, qualitative analysis, and organic), physics, biology, and either French or German.

All applications must be accompanied by a statement from the proper authority in the school from which the applicant comes recommending him for admission to the Medical School.

For announcement and further information, address

C. W. EDMUNDS, M.D.
Assistant Dean **ANN ARBOR, MICH.**

UNIVERSITY OF BUFFALO
Medical Department

CO-EDUCATIONAL

Seventy-Sixth Session Begins September 26, 1921

Laboratories fully equipped. Students have ample facilities for personal study of cases. Only medical school in a city of half a million population. Positions as interns in hospitals for all graduates.

Requirements for admission—Two years of work in an approved college, including physics, chemistry, biology and a modern language, in addition to a four-year high school course.

Full information on application to the Secretary, High St., Buffalo, N. Y.

Creighton University College of Medicine

For Particulars Address

The Dean

Creighton University College of Medicine

14th and Davenport Sts. Omaha, Nebraska

Boston University School of Medicine

Founded 1873

REQUIRES FOR ADMISSION a minimum of two pre-medical college years including Chemistry, Physics, Biology, and in addition to English, at least one foreign language.

REQUIRES FOR GRADUATION a minimum of four years of graded medical studies.

THE SCHOOL OFFERS: a graded five years course including hospital internship;

a six year combination course with the College of Liberal Arts of Boston University, whereby a successful candidate may obtain the degrees Sc.B. and M.D.;

a diversified curriculum covering the entire range of modern medical practice;

unusually extensive clinical facilities in the Boston City Hospital, Massachusetts Homeopathic Hospital, Haynes Memorial for Contagious Diseases, Robinson Maternity, Evans Memorial for Clinical Research and Preventive Medicine, and the Westboro State Hospital for the Insane.

Information furnished on application to the Registrar

EDWARD E. ALLEN, M.D.

80 East Concord St. Boston, Mass.

Western Reserve University SCHOOL OF MEDICINE

ONLY MEDICAL SCHOOL IN THE CITY OF CLEVELAND

¶ Admits only college degree students and seniors in absentia.

¶ Excellent laboratories and facilities for research and advanced work.

¶ Large clinical material. Sole medical control of Lakeside, City, Charity and Maternity Hospitals, and Babies' Dispensary. Clinical Clerk Services and individual instruction.

¶ Wide choice of hospital appointments for all graduates.

¶ Fifth optional year leading to A.M. in Medicine.

¶ Vacation courses facilitating transfer of advanced students.

¶ *Session opens Sept. 30, 1920; closes June 16, 1921. Tuition, $200.*

THE REGISTRAR, 1353 East 9th St., Cleveland

DARTMOUTH MEDICAL SCHOOL

ESTABLISHED IN 1797

HANOVER - NEW HAMPSHIRE

Candidates for the A.B. or B.S. degree in Dartmouth College may satisfy the specific requirements of both the College and the Medical School in three years, and may elect the first year in Medicine as the Senior Year in College.

Dartmouth Medical School has bestowed no degrees since 1914. Fully equipped modern laboratories are provided for the courses of the first two years. Quiet surroundings and personal supervision and instruction by the Faculty favor individual work and insure the thorough preparation necessary for later advancement and success. At the end of the second year candidates are eligible for transfer to leading metropolitan schools to complete the work of the clinical years of the course.

For further information address

COLIN C. STEWART, Secretary

UNIVERSITY OF NORTH DAKOTA
SCHOOL OF MEDICINE

Grand Forks - North Dakota

Two years of college work including courses in Chemistry, Physics, Biology, English, and French or German, are required for admission.

The University offers a combination course consisting of two years of pre-medical college work and two years of medicine. Upon those who complete this course it confers the B.S. degree and a certificate that is accepted for entrance to the junior year in many of the best medical schools in the United States.

Special courses are offered to advanced students and to physicians. For Bulletin and information address

H. E. FRENCH, M.D., Dean, Grand Forks, North Dakota

UNIVERSITY OF PITTSBURGH
THE SCHOOL OF MEDICINE

Regular four-year medical course leading to the degree of M.D. and seven-year combined collegiate and medical course leading to the degrees of B.S. and M.D.

REQUIREMENTS: **Four-year course.** Four years of accredited high school work and two years of college work in a recognized institution of college grade, including two years of Chemistry, of which at least one-half year must be in Organic Chemistry, one year of Biology, one year of Physics, these subjects to be taught in the laboratory, as well as didactically, one year of English, and a reading knowledge of one of the following foreign languages: French, German, Italian or Spanish, or two years of approved college work in one of them. **Seven-year combined course.** Graduation from an approved four-year high school.

GENERAL: Thirty-sixth annual session opens September 26, 1921. Catalog and information regarding courses on request.

Raleigh Russell Huggins, M.D. Dean, Bigelow Boul., Pittsburgh, Pa.

CORNELL UNIVERSITY
MEDICAL COLLEGE

Admission Restricted

For admission in September, application should be made not later than June.

For further information and catalog, address THE SECRETARY,

Cornell University Medical College
First Avenue and 28th Street **New York, N. Y.**

Medical College of
The State of South Carolina

Schools of Medicine, Pharmacy and Nursing, Owned and Controlled by the State

Well equipped laboratories. A full corps of efficient all-time teachers. New laboratory building under construction.

Located opposite the Roper Hospital and very near the Charleston Museum, thus affording the students more extensive opportunities for research and training.

Women admitted on the same terms as men.

For catalog address **H. GRADY CALLISON,** *Registrar*
Calhoun and Lucas Sts. **CHARLESTON, S. C.**

THE UNIVERSITY OF VERMONT
College of Medicine

This is an A-Grade Institution according to the Ranking of the American Medical Association. It has Well Equipped Modern Laboratories and Abundant Clinical Facilities.

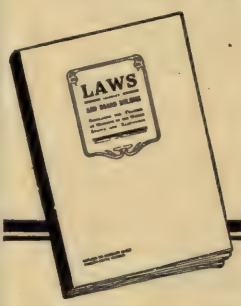
Expenses are Moderate: Tuition Fee, $200; Room Rent, $80 to $100 and upward; Board at Commons Hall, at cost, has recently been $7.00 per week.

For Catalogue, Bulletins or Special Information, Apply to Dean H. C. Tinkham or

THE COMPTROLLER, University of Vermont, Burlington, Vt.

SYRACUSE UNIVERSITY
COLLEGE OF MEDICINE

ENTRANCE REQUIREMENTS: Two years in a registered College or School of Science. Combination courses recognized.



LABORATORY COURSES in well-equipped laboratories under full-time teachers.

CLINICAL COURSES in the University Hospital, one general, one special, and the municipal hospitals and in the dispensary adjoining the college, in all of which senior students serve as clinical clerks. Tuition $200.

Address The Secretary of the College of Medicine.
307 Orange St., Syracuse, N. Y.

Up-to-date Information on

MEDICAL LAWS

COVERS EVERY STATE
ALSO
FOREIGN COUNTRIES

THIS book gives in simple, non-legal, abstract form the essential information on medical practice in each state of the Union. This includes names of

Examining Board Members
Fees, dates and places of examinations
Form of Application for License
College Standards Required
Exemption and Reciprocity Regulations
Definition of Act

In addition, it gives requirements of medical practice in leading foreign countries; list of medical schools; classification of and data on United States medical colleges and a convenient reciprocity table.

Physicians or medical students contemplating practice outside their home state will find this book a valuable guide.

SULPHUR LICK SPRINGS
HOTEL and SANITARIUM

***For* Diabetes, Rheumatism, Neuritis, Gout, Stomach, Kidney and Liver Trouble, and High Blood Pressure**

OUR new, modern building of one hundred rooms—a thoroughly equipped place for recreation, as well as a health resort—has every facility for Hydrotherapy, Electrotherapy, Turkish, Russian, Sulphur Lick Mineral Baths, Salt and Alcohol Rubs, Massages, Fomentations, Sinusoidal and Tub Baths.

In addition to our treatments and the use of the Sulphur Lick Water, which serves as a stomachic, diuretic and Hydrogogue, we have installed a complete system of diet, which meets the requirements of the individual case.

In all cases, before treatments are assigned, a thorough examination is made, including urinalysis (chemical and microscopical), blood pressure, blood count, X ray, etc.

All our nurses and bath attendants are graduates.

Seldom has nature bestowed more picturesque beauty at the very gateway of a health resort than at SULPHUR LICK SPRINGS, located on the banks of the historic Fox River. Here you will find winding paths through the quiet woodlands, rolling meadows, and deep ravines.

GOLF, TENNIS, GYMNASTICS, SWIMMING, BOATING, and FISHING

are some of the amusements for the health and pleasure seeker

Booklets will be mailed upon request

"NORWAYS"

An Institution devoted to the Research Study and Diagnosis of all problems in Medicine and Surgery. Especially the conditions involving the Nervous System.

All the newer clinical and laboratory methods of Diagnosis are employed.

It is our policy to return patients to their family or personal physician as soon as a Diagnosis is made and a proper line of treatment instituted. Therefore, we desire the co-operation of physicians in the study of their cases, in order that there be no relapse in the plan of treatment best adapted to the interests of the patient on his return home.

For further particulars, address,
DR. ALBERT E. STERNE, or DR. LARUE D. CARTER
Care of "Norways" Hospital

The Lady Mary Maternity Home,

A STRICTLY ETHICAL AND PRIVATE REFUGE FOR SECLUDING AND PROTECTING

RESPECTABLE UNMARRIED PREGNANT WOMEN

through confinement, without publicity, with medical care and trained nursing. Baby placed for legal adoption if arranged. Early entrance suggested, or soon after fifth month as possible. No criminal practices tolerated. City and state license. Ethical physicians may handle their own cases. Rigid investigation invited. Many years hospital experience in this specialty. Rates reasonable. Correspondence confidential.

For details, address

DR. J. E. GARRISON, Physician in Charge, Birmingham, Alabama.

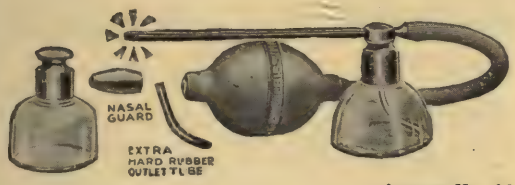
Bloodless Enucleation of the Faucial Tonsils Made Possible

La Force Hemostat Tonsillectomes



Made in 3 Models—B, C and D—Two Sizes

A true Hemostat is provided in combination with a knife. The tissues immediately back of the tonsil are held and crushed in the hemostat and the knife is arranged to sever the tonsil from the tissues so held.
The Hemostat may be left holding and crushing the tissues even after the tonsil has been removed.
The hemostatic effect is sufficient in many cases to eliminate any bleeding.

Seven large plates in true-to-life colors. Anatomically accurate in all details—absolutely reliable—complete in all essentials—graphic and distinct.

A NEW PLATE
illustrating the
HUMAN MALE AND FEMALE GENITALIA
is now ready. Reproduced true to life from original drawings by Max Brodel. Of special interest to all doctors.

These charts are widely used by progressive Physicians, Surgeons, Medical Colleges, Hospitals, and Nurse Training Schools.

He Has Two Good Legs

BOTH MADE BY MARKS

Although a man may lose both his legs, he is not necessarily helpless. By using artificial legs of MARKS PATENT he can be restored to usefulness. One of these engravings is from an instantaneous photograph of a man ascending a ladder. He has two artificial legs substituting his natural ones, which were crushed in a railroad accident. With MARKS PATENT Rubber Feet with Spring Mattress he can ascend or descend a ladder, balance himself on the rungs, and have his hands at liberty. He can work at a bench and earn a good day's wages. He can walk and mingle with persons without betraying his loss; in fact, he is restored to himself for all practical purposes.

With the old method of complicated ankle joints, these results could not be so thoroughly attained.

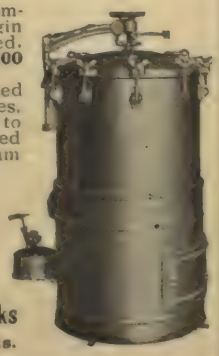
Over 54,000 in use, scattered in all parts of the world.

Purchased by the United States Government and many Foreign Governments.

Send for MANUAL OF ARTIFICIAL LIMBS, containing 384 pages, with 674 cuts. Instructions are given how to take measurements and obtain artificial limbs without leaving home.

Established 67 years.
A. A. MARKS
696-702 Broadway, New York.
U. S. A.

National HIGH PRESSURE Sterilizers

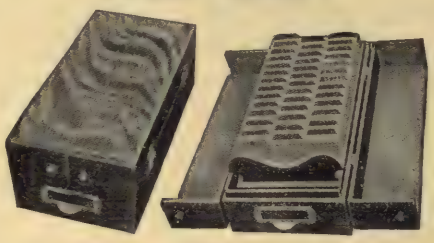


FROM zero to 20 pounds steam pressure, at a temperature of 262°, in a few moments—an abundance of sterilized "bone-dry" dressings—years of accurate service are assured every National user.

National Aluminum Autoclave—Complete, compact. Retort cast virgin aluminum, all fittings nickel plated. Heated over any fire or flame. **$45.00**

National Steel Sterilizer—Designed especially for hospitals, laboratories, clinics, first aid stations. Equal to the most expensive outfits. Equipped with gas or gasoline burner or steam coil.

Doctor's $70 Medium $100
Hospital $165



Sold by all supply houses—order direct if you can't get the needed size.

Improved Barany Douche Bag

The unusual interest in the study of the semi-circular canals at this time especially in the value of ear examination for intraaranial localization has created a demand for a suitable chair.

The American modification of the Barany Chair as suggested by Colonel Isaac H. Jones has all the latest features for the study of nystagmus after stimulation of the ear for intracranial localization, and for differential diagnosis between ear lesion and brain lesion (see Jones' Book, "Equilibrium and Vertigo", published by J. B. Lippincott Co.).

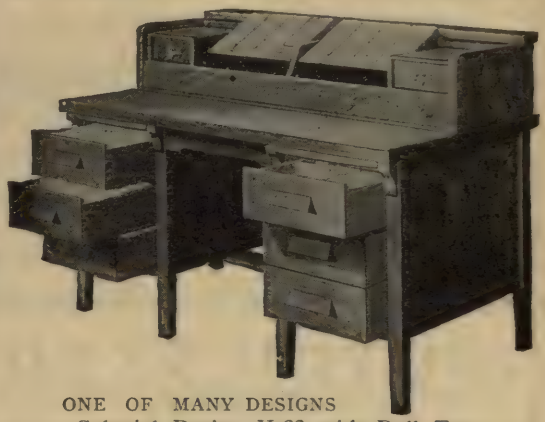
BLUEBERRIES

Sturdy Nursery-Grown Plants

THE Blueberry, although among the finest of fruits and the finest of all berries for pies, is almost unknown in the average garden. This is due to the scarcity of nursery-grown plants, the only kind that transplant easily.

We have to offer this year some excellent nursery-grown plants—ideal for successful results in the home garden. The plants are very hardy, rapid growers and heavy bearers. Blueberries can be planted successfully in the Autumn or Spring.



The flavor of the Blueberry is almost impossible of description. The Blueberry is in a class by itself, with its delicious melting flesh, full of rich creamy juice and a delicate wild taste all its own. Next summer when you are eating luscious Blueberry pies made from berries picked from your own bushes you will appreciate the wisdom of planting Blueberries.

WRITE today for our illustrated Catalogue describing Blueberries; also fruit trees, shrubs, ornamentals and evergreens.

See This Mesh

WALLACE'S LINEN MESH UNDERWEAR

is made of a fabric that gives the skin an opportunity to function. A special knitting process creates myriads of artificial air cells in addition to those natural to the flax fibre itself.

Instead of imprisoning bodily exhalation, moisture, etc., next to the skin, Wallace's Linen Mesh garments promote quick radiation. In warm weather, they conduce to comfort and personal hygiene by rapid disposal of excess perspiration. In cool or changing weather, the air cells form one of the best nonconductors of bodily heat.

Your friends and patients will be glad to know about Wallace's Linen Mesh Underwear.

Made in all styles of garments. Send for book of samples. Special discount to physicians.

THE MORSE WAVE GENERATOR

A Synchronous Inductive Surge of a Rolling "Wave" Type

A NEW highly improved method in the field of Electrotherapeutics generating a current of a high multipolar type with twenty-one thousand alternations or forty-two thousand impulses per minute, which are grouped within smooth surging cycles (waves) made variable in character, length and period of rest at the will of the operator, all of which lessens the convulsive spasmodic jerking of muscular structure and skin irritation, thus making deep as well as superficial stimulation possible without discomfort to patients.

The apparatus, which is mechanically perfect, simple in construction and manipulation, is constructed to wear many years. It is a modification with many important improvements of the original d'Arsonval Sinusoidal machine made in Paris.

The superficial and deep stimulating effects are highly efficacious in the treatment of Intestinal Stasis and allied complications, constipation, gastric and colonic infection, or general enteroptosis, and all muscular conditions where nerve nutrition is impaired.

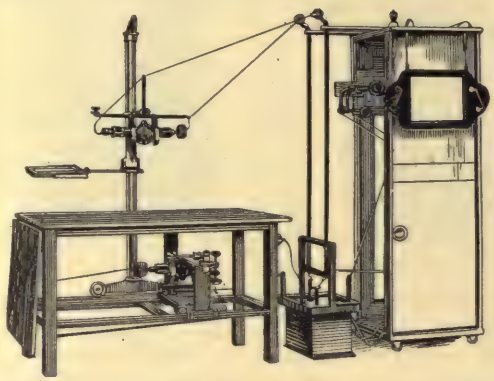
The design is so constructed that the resistance controlling the Surging Wave is devoid of wire winding in the circuit with the patient and the Surging Wave is automatically generated and controlled by a lateral moving armature, all of which eliminates the possibility of burnouts and faults and guarantees a high and long service of a Sinusoidal Surging type of Apparatus.

The 1919 model delivers not only the alternating current on the A. C., or D. C., without transformer or converter, but will produce all the polar effects as expected from the direct (galvanic) current.

MORSE-CHAPMAN COMPANY, 462 Boylston St., Boston, Mass.

TEMPERED GOLD HYPODERMIC NEEDLES

Cannot Rust and their immunity from corrosion contributes the last word in hypodermic asepsis and technical efficacy.



Moderate cost and great durability indicate an obvious economy and eliminate every obstacle to their universal adoption.

We have the only successful Tempered Gold Hypodermic Needle on the market

Made in lengths from ⅜ inch to 3½ inches and in gauges from 24 to 17. Order through your dealer. Literature on request.

CALCREOSE

TUBERCULOSIS

Calcreose is a mixture containing in loose chemical combination approximately equal parts of creosote and lime.

Calcreose has all of the pharmacologic activity of creosote, but does not cause any untoward effect on the gastro-intestinal tract.

Therefore, **Calcreose** is particularly suitable in the treatment of pulmonary tuberculosis as an adjunct to other remedial measures.

"Caffeine is for temporary and emergency stimulation only, not for persistent use."

95% Purin-Free Coffee

Professor Alexander Bryce, Cambridge, in "Modern Theories of Diet," page 102,

> **"Purins are purins, whether contained in vegetable or animal food—this compares favorably with 1.2 grains of methyl purin in every cup of tea and the 1.7 grains of the same substance in every small cup of coffee."**

Gouty, nephritic and arterio-sclerosis patients find it a real hardship to follow medical orders in giving up coffee.
But Von Noorden, himself, allows such patients KAFFEE HAG—real bean coffee with 95 per cent. of the caffeine and purin removed.

Make Your Refraction Case Error-Proof!

Master Model Ski-optometer
No. 215

The "last word" in Optical Instrument Efficiency.

$275.00 Net for Model No. 215 with Cylinders, Sphericals, Rotary Prisms, Maddox Rods and Phorometer.

$175.00 Net for No. 205 with Spherical only. Both models equipped with the latest muscle-testing appliances, giving choice of Wall Bracket, Floor Stand, Chair Clamp, or Chair Attachment.

WITH THE SKI-OPTOMETER YOU *CANNOT* PRESCRIBE THE *WRONG* LENSES FOR YOUR PATIENT—IT IS MECHANICALLY *IMPOSSIBLE.*

Your knowledge of refraction combined with The Ski-optometer's simplicity, invariably insures accurate results. You simply turn a single reel—one for your cylinders and one for your spherical. Once you're through, having attained best result, the exact total of your findings is registered, ready for you to write your prescription.

Furthermore—the time saved through eliminating the transferring of trial case lenses, allows you to make a muscle test in *every* examination.

Send for your free copy of "The Story of The Ski-optometer." It points out many of this instrument's exclusive points.

There's a Convenient Payment Plan.

Can You Always Expect Definite Results From the Drugs You Use?

Emphatically yes—if you administer ZEMMER pharmaceuticals

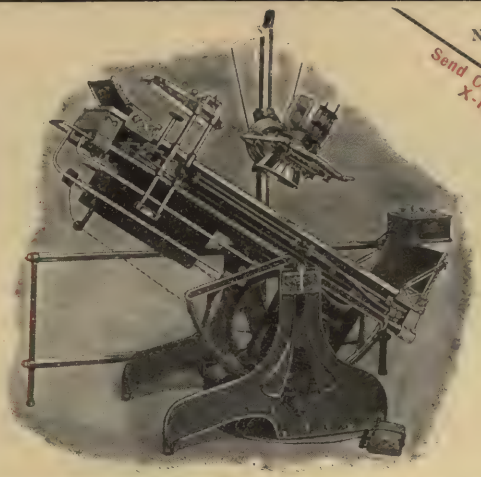
We manufacture DRUG COMBINATIONS especially to supply DISPENSING PHYSICIANS

Dispensing our preparations positively removes all uncertainty. Choose your drug combinations from our catalog—carefully and repeatedly test the clinical efficiency of our products—your confidence in our preparations will be established—you will know our drugs give definite therapeutic results.

Every product which bears the ZEMMER LABEL is a guarantee as to

Accuracy of Dosage **Full Potency** **Uniform Composition**
Perfect Purity **Palatability** **Definite Physiologic Activity**

Private dispensing has many advantages:



(1) Your medication is under your personal observation and control.
(2) Treatment may be begun immediately upon making a diagnosis.
(3) Medicines may be changed quickly as indicated.
(4) In emergencies and night visits, treatment is at your immediate command.
(5) It gives the patient confidence in you.
(6) You know the drugs your patients take—"substitution" does not trouble you.

In our price list we describe a large number of valuable U.S.P. liquid combinations, tablets, capsules, ointments, syrups, elixirs, etc.—each one properly labeled for private dispensing. All orders are filled from absolutely fresh stock and shipped direct from our laboratory to the office of physicians anywhere in the U.S.A.

Always ready.

Always Sharp ~ Always Untarnished ~ Always Polished

STELLITE Surgical Instruments, we believe, are not only the best obtainable, but the most beautiful made. Surgeons everywhere use and endorse them.

STELLITE SURGICAL INSTRUMENTS meet in every particular the exacting needs of the profession. Stellite is an alloy of semi-rare metals, containing no iron, and surgical instruments made of it will not rust, tarnish, stain or corrode. They are not affected by sterilizing processes or preparations, including iodine and bichloride of mercury, nor are they affected by heat up to 1800° F.

Instruments made of this beautiful metal are harder than any steel, and will take keener points and edges, yet they may be readily resharpened should the need arise. They will remain sharp much longer than instruments of steel.

DIFCO

DEHYDRATED CULTURE MEDIA

ACCURACY is the goal of all work in bacteriology, as well as in chemistry. It is better served when all bacteriologists work with uniform culture media, standardized to a high degree of uniformity, as in the use of "Difco" Culture Media, Dehydrated. Uniformity of cultural factors is assured, either for the **same** worker at **different** times, or for **different** workers at the **same** time.

SPEED is greatly desired in bacteriological procedure and no advance in this respect has been made for many years that compares with the use of "Difco" Culture Media, Dehydrated. The saving in time, as contrasted with the old methods, is easily demonstrated, and the difference is incredible.

CONVENIENCE becomes a prime consideration when accuracy and speed are at stake. The convenience of "Difco" Culture Media, Dehydrated, can be appreciated only by actual trial. Think of having a dozen different formulas in convenient packages on your shelves, needing only one weighing and the addition of water to obtain a medium ready to sterilize.

ECONOMY is a consideration when quality has been satisfied. The use of "Difco" Culture Media, Dehydrated, assures economy, not only thru the factors of **Accuracy, Speed,** and **Convenience,** but by actual comparison of costs, based on materials, labor, and time.

More than a dozen standard formulae, all carried in stock by the principal dealers in scientific supplies

Shelton
PHYSICIAN'S VIBRATOR

Outfit No. 1 for Physicians

FOR quieting pain of rheumatism, neuralgia, etc.; for increasing circulation and thereby reducing congestion; and for reaching, through the spinal nerves, the deep seated organs presided over by the sympathetic nervous system, the value of vibration is well established.

THE Shelton Physician's Vibrator is a simple portable outfit that has a range of vibration from 10,000 to 30,000 per minute. Gives any length stroke desired from a short stroke causing only a faint tremor to a long heavy stroke for deep massage. At even the highest speed the handle is not affected by vibration, the full effect being transmitted to the patient. Either direct or alternating current fully guaranteed.

Shelton Centrifuge

Latest Model Portable

WHY not make your own determinations in analyses of urine, milk, etc., and in other quantitative tests?

This efficient Centrifuge will enable you to do much of this work with scientific accuracy and greatly increase your diagnostic service without much outlay of money or elaborate installation. Has many features of convenience. Need not be fastened to any permanent base. The gyroscopic balance wheel holds apparatus absolutely steady while running. Combination speed control and starting switch is located at the end of cord 10 feet from machine. Uses either direct or alternating current. Control regulates speed from 500 to 10,000 R. P. M. Equipped with two sedimentation tubes (one graduated); complete with rheostat. Fully guaranteed. Ask your dealer or send for special circular.

Shelton Electric Co.

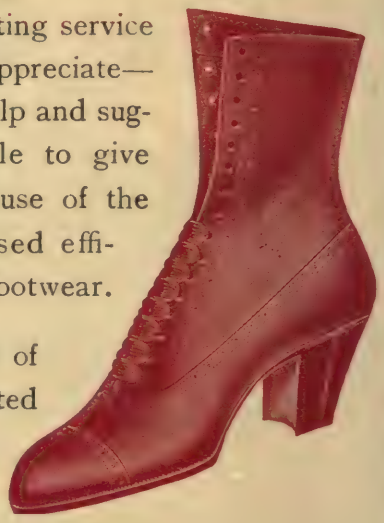
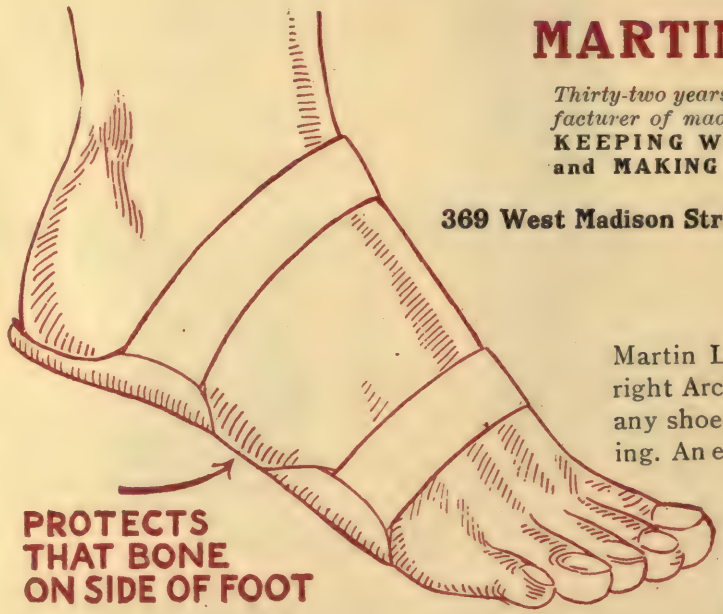
Complete Line of Shelton Vibrators



Smaller Type for Home Use

To physicians prescribing Vibrator for home treatment we suggest that Shelton machine be insisted upon, as otherwise patient may be induced to purchase an inferior product which will have *no real therapeutic value.*

Scientifically Designed Shoes and Arch Protectors for All Types of Foot Ailments



Ours is a shoe designing and shoe fitting service that both you and your patient will appreciate—you, because of the practical help and suggestions we are able to give—your patient, because of the comfort and increased efficiency made possible by our made-to-measure footwear.

It has been our privilege to serve thousands of people who suffered from broken arches, twisted toes, weak ankles and other painful foot ailments induced by ill fitting shoes. They are now enjoying the benefits of a pair of our made-to-measure shoes or arch protectors.

We invite correspondence with all physicians having patients who might be benefitted by scientifically designed, made-to-measure footwear.

MARTIN LARSON

Thirty-two years a designer and manufacturer of made-to-measure shoes for
KEEPING WELL FEET WELL
and MAKING SICK FEET WELL

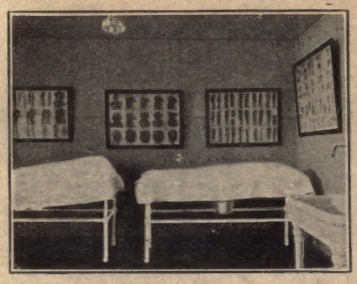
"The Great Teacher of Surgery—PRACTICE"

POSTERIOR GASTRO-ENTEROSTOMY

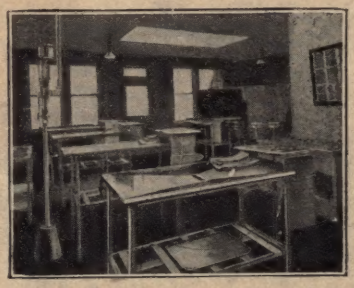
IF your technique is good make it still better; if you lack confidence for certain operations, acquire it by actual, intensive practice and adequate repetition. This opportunity is offered by the

Laboratory of Surgical Technique



through its 50 hour post-graduate course in general surgery. Here the student performs the actual operations himself—on the **stomach, intestines, gall-bladder, kidney** and **ureter, thyroid, hernia,** etc.,—under competent instruction with strict attention paid to anesthesia, table toilet, etc.

The work on the live dog is done as humanely as upon an anesthetized human.



Each table is furnished with the instruments found in any well-equipped operating room; gowns and gloves are supplied to each student. In addition to the routine work, special demonstrations are given throughout each week on bone and joint work, blood transfusion, etc. A review of surgical anatomy is embraced in the course. *Special courses may be had in surgical and topographical anatomy on the cadaver.*

The Laboratory of Surgical Technique has now been established 6 years, and has a record of thousands of satisfied students. The work embodies the best technique of the time, together with many original improvements. The course is completed in seven days (50 hours), which means *a minimum time away from your practice.*

Special arrangements may be made for courses in orthopedics, eye, ear, nose, and throat surgical anatomy, etc.
